ENNOGIE
SOLAR GROUP

Purpose

Affordable access to green and clean energy from the sun for more of us and sustainable for all of us.

Vision

Ennogie wants to turn all buildings into sustainable energy producers with solar technology.

Mission

We develop and integrate solar solutions for buildings; roof-, battery- and control systems made to integrate seamlessly with all types of buildings to produce sustainable electricity.

How it works

- The Ennogie solar roof converts solar energy into electricity using solar panels and micro-inverters. The energy is consumed by the different devices and appliances.
- Excess energy is stored in the Ennogie battery, which makes it possible to save for later use.
- The Ennogie Smart meter monitors the consumption and production and makes sure of a sufficient and constant energy supply from the roof, the battery or the grid.

Focused support of 4 SD Goals.

Ennogie cares about the future of our planet and the people we share it with. Our products do not only support the goals directly, but to a large extent also our customers ambitions towards making change based on the SDGs.

- 7 Affordable and Clean energy, *our core purpose*
- 9 Industry, Innovation and Infrastructure, *what we build*
- 11 Sustainable Cities and Communities, *what we achieve*
- 12 Responsible Consumption and Production, *what we share*

BIMÅLER-KONCEPT

+ FORDELE

- Maksimal udnyttelse af solcellestrømmen
- Sparet gebyr til netleverandør
- Enkel installation

- ULEMPER

- Administration for Udlejer
- Udfordringer med lejeloven
- Udfordringer med matrikulering
- Enstemmighed/afgive frit elvalg

HOVEDMÅLER-KONCEPT

+ FORDELE

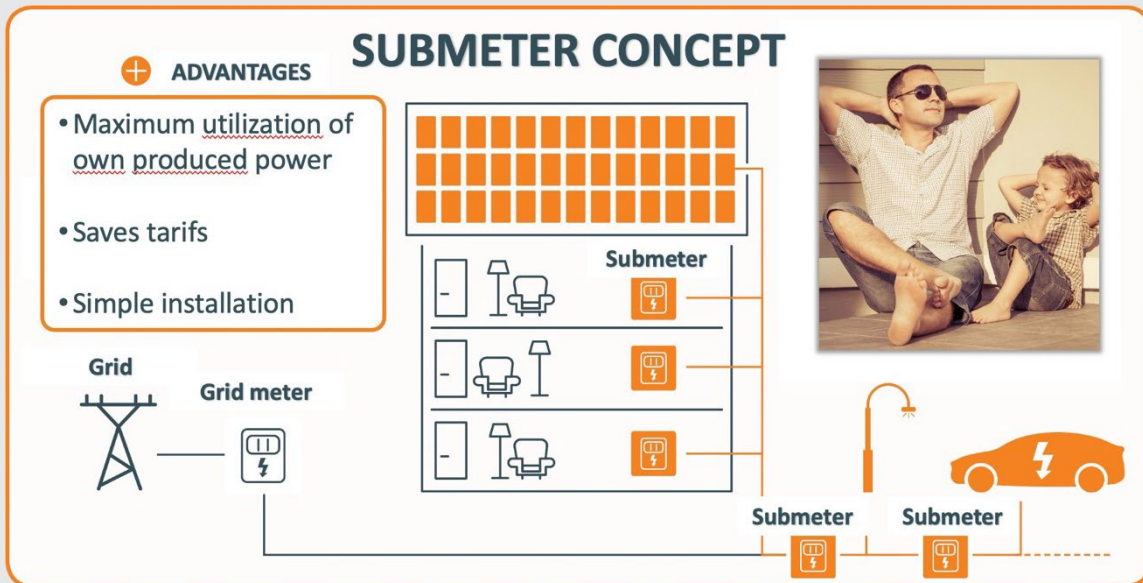

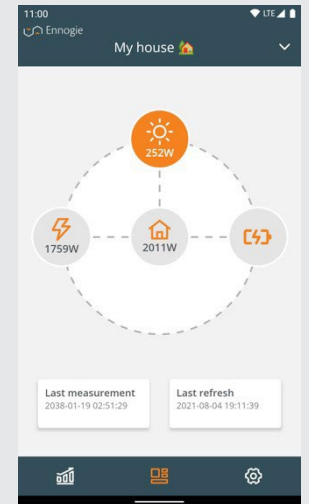

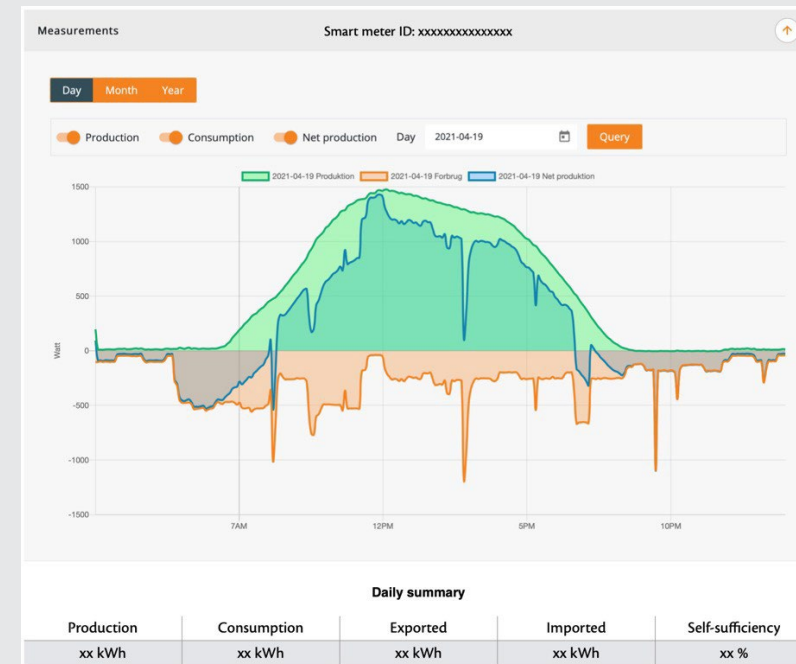

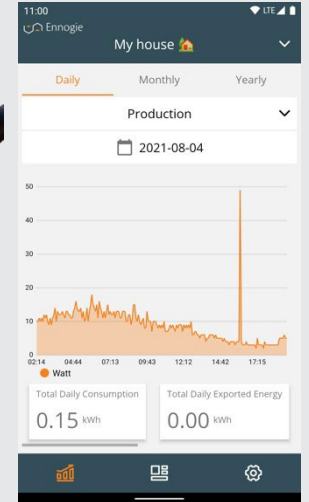

- Ingen administration
- Enkelt at forklare
- Den enkelte beboer ser resultatet af egen indsats
- Ingen er afhængige af andres opførsel

- ULEMPER

- Ingen udnyttelse af solcelle-strømmen til fælles bedste
- Overskudsstrøm sælges til netselskab til 25 øre/kWh

Ennogie has developed a smart energy solution to collect, distribute and settle production and consumption data from the Ennogie solar roof with and the subsequent distribution to the individual housing units. This will be done by setting up smart meters and connecting via mobile data network in a platform and user interface for the housing associations and the individual residents.

ENNOGIE SOLAR GROUP

“We are excited about the future of Ennogie Solar Group and the significant market opportunities that lie ahead. Our products are already contributing to the green transition and the restructuring of the European energy supply. With increasing support from politicians and building owners, we are well-positioned for long-term structural growth.”

- Lars Brøndum Petersen, Co-founder & CEO
